

SEO URLs - 404 Not Found Error

This is regarding to the Premium u-Auctions Script

- having problems with pages using SEO URLs not loading at all and instead showing 404 Not Found?
- Is your u-Auctions script address like this (http://your_domain.com/uAuctions = in a subfolder OR http://your_domain.com/ = main root folder?

HTACCESS

- If the u-Auctions script is in a sub folder then you will need to edit the HTACCESS
- Open the HTACCESS file in Notpad and you will see this line

```
> RewriteBase /
```

- You can just delete that line or for better security just edit the RewriteBase so it uses the sub folder name in front each page like it is shown below.
- Change the uAuctions to the folder name that you are using.

```
> RewriteBase /uAuctions/
```

Sub-Domain

You can make a sub-domain name to point to your u-Auctions script and it would look like this

- Old domain name = http://your_domain.com/uAuctions
- Sub-domain name = http://uAuctions.your_domain.com

And that should fix the problem if you are running the u-Auctions script in a sub folder on your server.

Can't upload auction pictures

If your uAuctions script is installed in a sub-directory you will have to edit the main.js page. You can find this page at

```
uAuctions -> themes -> default -> js -> upload -> main.js
```

and the line of code you need to edit is this code.

```
// Initialize the jQuery File Upload widget:
$('#fileupload').fileupload({
    // Uncomment the following to send cross-domain cookies:
    //xhrFields: {withCredentials: true},
    url: '/uploaded/'
});
```

Add your sub-directory name to the code so that it looks like this

```
// Initialize the jQuery File Upload widget:
$('#fileupload').fileupload({
    // Uncomment the following to send cross-domain cookies:
    //xhrFields: {withCredentials: true},
    url: '/uAuctions/uploaded/'
});
```
